# Energy Saving Measures / 省エネ対策

Type of measure 対策タイプ	Measure /	'実施対策
	Cleaning the air conditioner filter	空調機のフィルターの清掃
	Shortening the operating time of air conditioning	空調の運転時間短縮
	Keep air-conditioning temperature and humidity (summer: 28 degrees, winter: 20 degrees)	冷暖房設定温度・湿度の緩和(夏場: 28度、冬場:20度)
	Turns off the lights at unnecessary parts and unnecessary time	不要箇所・不要時間帯の消灯
	Introduction of scheduled/intermittent operation system for air conditioning	空調・換気のスケジュール運転・断続運転制御の導入
	Reduce the consume of paper	紙の消費量の削減
	Introduce coolbiz & warmbiz	クールビズ&ウォームビズの導入
Partial upgrade • Function addition	Improved heat insulation of windows (film, paint, glass, blinds, etc.)	窓の断熱性・遮熱性向上(フィルム、塗料、ガラス、ブラインド等)
部分更新·機能付加	Introduction of LED lighting	LED 照明の導入

### Change to renewable energy/再エネへの切替

Increase renewable energy sources to at least 40% of its own electricity use by 2030.

Consider the following two methods. The ratio will be decided based on the costs by the end of 2022.

2030年までに利用電力の40%を再工ネ由来の電力に切り替える。

下記2つの手法を検討。割合はコスト等を考慮しながら2022年中に決定。

Purchase Measure 調達手段	Merit	/ 長所	Demerit/短所			
Contract renewable energy menu with retail company 小売電気事業者と再エネ電気メ ニューを契約	Transaction costs are relatively low	取引コストか相対的に	The procedures for switching utility company is complicated	電力購入先の切り替え のための手続きが多い		
	Be able to purchase in small amount	小口でも調達可能	procurement because	契約電力会社の再エネ調達力に依存するため、		
	Some retail company offers individual plans for large customers		of depending on the procurement capacity of retail company.	将来の調達リスクがあ る。		
Purchase Green Energy Sertificate o Non Fossil Sertificate 写工ネ電力証書等の購入	Be able to purchase renewable energy value without switching utility company	電力購入先の切り替え なしに再エネ価値を調 達可能	Price fluctuations and relatively expensive	価格変動があり、か つ、相対的に高価		
	It is not required long- term contract and we can purchase according to market conditions.	長期契約が不要で、市 況に応じて購入判断が 可能	Distribution volume is limited at this time	現時点で流通量が限定 的

### Schedule / スケジュール

year	Execution	Planning Period(Year) / 計画期間(年)									
	対策実施年	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030
Plan① Energy saving 省エネ	2021	Execution 実施									
Plan② Change to RE 再エネへの切替	2023	Planning 選定※		Execution 実施							

#### 

- Determining the purchase amount of renewble energy and green energy certificate
- Selection of retail utility companies
- Selection of green energy certificate
- Contract procedure

#### ※2021年~2022年にかけて行うこと

- ・小売電気事業者から購入する電力量と再工 ネ電力証書等の購入量の決定
- 小売り電気事業者の選定
- ・再エネ電力証書の選定
- •契約手続き
